Bob: I think Hugh spoke to you and/or Don about this Turkey. We have discussed it and really do feel it is more within your technical competence than ours, but have done this draft for your review and comment.

Could you give us your ideas, and next week, perhaps we could discuss it further as to what would make the most sense as a course of action. One thought might be to circulate a draft with your committee, with the proviso to check with the IHC rep in each agency, and some time in the next month or so, come back with their comments and then draft a smooth for formal consideration.

One of our problems is knowing what else is doing in the security and release world which impacts on this as a policy matter, what new documents should ~~have~~ be added (like some of the new NIO productions) and whether or not any of the daily products like the NIB or NID should be considered.

Don't mean to dump, but we are trying to be helpful and hence the draft - a first try.
